LIGHTING SETUP

#	TYPE OF LIGHT	LIGHT MODIFIER	POWER SETTING	NOTES
L1: LHS	Broncolor Siros	75 Octa	6	
L2: RHS	Broncolor Siros	75 Octa	6.3	
L3: TOP	Broncolor Siros	30x120 Softbox	7	
	Reflector Board			

- Side light set quite low, lights leading edge of wing and throws light over top surface.
- Octa on each side highlights any structural colour in wing. Set low to the table and tilted slightly back, so heavily feathered, and slightly camera side of wing. They also fill shadows and high light tips and wing edges.
- Reflector board placed opposite strip box highlights trailing edge of wing and evens tone on background.
- For Tui wings 75 Octa were raised up and point down at 45deg, for these wings only it showed more of the different colours in the feathers.
